ACCESS SERVICE**USERS GUIDE**

This tariff contains the regulations, rates and charges applicable to the provision of Access Service by all of the Issuing Carriers listed on Title Page 2.

The regulations applicable to the provision of Access Service are contained in Sections 2 through 16. These regulations are identical for all Issuing Carriers.

Each specific Carrier's rates and charges for all Access Services are shown in Section 17. In the right-hand margin in Section 17, a Tariff section reference is shown which references the appropriate tariff section where the application of the rate is located. If an Issuing Carrier does not presently have a rate for one of the rate elements shown in Section 17, the rate is shown as "Not Applicable" (N/A). Upon receipt of an order by a customer for the service not presently offered, the Issuing Carrier will file with the F.C.C. the appropriate information necessary to establish rates.

In Section 17, each Issuing Carrier's rates are shown in a major section such as 17.2 or 17.3, etc. Whenever reference is made in the tariff to a specific rate element in Section 17, the reference will utilize an "#" to signify that the reference refers to each Issuing Carrier's rate for that service.

Example:

Telephone Company's rates are all shown in Section 17.2. References to the different access services would be as follows:

<u>Service</u>	<u>Tariff Reference</u>	<u>Location in Tariff Rate Section</u>
Switched Access Service	17.#.2	17.2.2
Special Access Service	17.#.3	17.2.3
Other Services	17.#.4	17.2.4

The "#" sign in the paragraph reference signifies that the reference is to each specific company's rates for that type of access service with each specific company having a separate subparagraph number. Each company's subparagraph number is identified in the Table of Contents.

ACCESS SERVICE**8. Digital Subscriber Line Access Service**

Digital Subscriber Line Access Service provides transmission services over local exchange service copper facilities, either as data only or as a data communications service, which is simultaneous to a local voice service. Service is provided, where available, between customer designated premises and designated Telephone Company Serving Wire Centers.

8.1 Asymmetric Digital Subscriber Line Access Service**8.1.1 General**

Asymmetric Digital Subscriber Line (ADSL) Access Service enables data traffic generated by the customer's equipment to be transported to an ADSL Access Service Connection Point using the customer's local exchange service facilities. At the ADSL Access Service Connection Point, the customer's ADSL Access Service must be connected to a telecommunications service provider's customer designated premises using either the Telephone Company's High Capacity Special Access, Frame Relay, or ATM Access Services as defined by the Telephone Company. An ADSL Access Service Connection Point is an interconnection point designated by the Telephone Company that aggregates data traffic from and to Telephone Company ADSL Serving Wire Centers (SWCs). The customer for ADSL Access Service may be the subscriber of the Telephone Company's local exchange service or a telecommunications service provider (TSP). (T) (T)

A generic view of how ADSL Access Service would be interconnected with a telecommunications service provider's network is depicted in the figure following. In this example, the customer's serving wire center is designated as an ADSL Access Service Connection Point. The customer orders ADSL Access Service pursuant to the provisions specified in this section. The ADSL Access Service customer's telecommunications service provider orders Special Access Service and/or Frame Relay Access service pursuant to the provisions specified in Sections 7 and 16 of the NECA Tariff F.C.C. No. 5, to connect its customer designated premises to the ADSL Access Service Connection Point.

ACCESS SERVICE8. Digital Subscriber Line Access Service (Cont'd)8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.1 General (Cont'd)**ADSL ACCESS SERVICE**8.1.2 Limitations

Company specific maximum upstream and downstream speeds are as set forth in Sections 17.3.4(H)(1), 17.6.4(I)(1), 17.10.4(H)(1), and 17.26.4(I)(1), respectively, following. These peak speeds are not guaranteed by the Telephone Company due to factors that may affect the actual speeds delivered, including loop distance from the Telephone Company Serving Wire Center, condition of the facilities, and limitations in the telecommunications service provider's network design. Customer premises equipment (CPE), which may be required in conjunction with the ADSL Access Service offering, is not included in ADSL Access Service. (T)

ADSL Access Service may not be used in conjunction with multi-point Special Access Service configurations as described in Section 7.1.3 of the NECA Tariff F.C.C. No. 5.
